ICE® Model 28C Hydraulic Vibratory Driver/ Extractor with Model 350E Power Unit

Patented design combines high eccentric moment (2,800 in-lbs, 32 kg-m) and suspended weight with clamp under 9,800 lbs (4445 kg).

Lighter weight provides for increased reach or use with smaller cranes.

Reduced height for better access in low-overhead situations.

Up to 55 tons (490 kN) line pull for extraction.

Patented Dual-pull™ suppressor provides maximum vibration isolation during driving and light extraction combined with high pull capability for tough extraction jobs.

350HP (261 kW) CAT C9 Tier 3 (State IIIA) engine meets all EPA & EU emission regulations.

Computer controls on power unit reduce fuel consumption, pinpoint repair needs, while providing diagnostics and logs.

Optional 1,484 lbs (673 kg) bias weights increase pile penetration rates in difficult soils.

Maximum efficiency and reliability are provided by our open-loop hydraulic system and application proven piston pumps and motor.

Remote-control pendant for vibrator and clamp with emergency stop. Engine speed control for fuel efficiency.

Full range of clamps available for sheet piling, H-Beams, pipe & caissons in addition to timber & concrete piles.

Adaptable for underwater, low headroom or box leads operation.

Environmentally friendly Chevron Clarity® non-toxic, biodegradable hydraulic oil.

Designed and manufactured in the USA by ICE®, world leader in cost-effective foundation equipment since 1974.
